

Heavyocity Announces Release of Creative Convolution Reverb Plugin, VAST

NEW YORK, February 1, 2024 – Heavyocity Media announces the release of *VAST*, an all-new creative convolution reverb plugin. This expressive designer tool redefines audio manipulation, allowing you to transport your sound to completely new and impossible spaces. With a wide selection of intuitive controls, this diverse palette of innovative reverbs, unique rhythmic echoes, and unconventional effects, *VAST* is a true playground for creative experimentation.

"The idea behind a convolution designer grew out of the techniques we've fine-tuned in our other products," shared Ari Winters, Creative Director, Heavyocity. "*VAST* isn't just another reverb plugin—it's like revealing a vibrant canvas for expanding, echoing, filtering, and transforming sound in unexpected ways. It reflects our dedication to pushing the limits of sound design."

At the heart of *VAST* is a flexible *Impulse Engine* chock full of creative controls and unexpected effects. Dive into a diverse array of banks featuring over 200 impulse responses, or personalize your experience by importing your own audio files as IRs. Reconstruct your sound with limitless artistic expression by intuitively combining an array of modules (convolution, gate, compression, EQ, delay, and dry/wet) to transport your source to entirely new sonic realms. To streamline your creative process, *VAST* also includes over 200 meticulously crafted presets, providing a quick start to your sonic exploration.

In line with Heavyocity's core values, *VAST* takes the ordinary and morphs it into something extraordinary, redefining the realm of reverb plugins and their capabilities. *VAST* is more than just a tool; it's an immersive experience in sonic exploration and transformation, making it an undeniably flexible creative playground.

And for a limited time, Heavyocity is offering *VAST* for \$79 (reg. \$99). In addition, owners of their *FURY*, *PUNISH* or *PUNISH Lite* plugins will receive an additional \$20 off (with registered products). Offers end February 12, 2024. Heavyocity is also offering a FREE, time-limited

demo of VAST— in demo mode users will be restricted to 15 minutes of audio manipulation time and no offline exports will be available.
