

INTRODUCING

# #StayHome

Homemade Loops to Benefit Those  
Impacted by COVID-19

Heavyocity's #StayHome is a collection of homemade loops to benefit those impacted by COVID-19. It was created entirely by the Heavyocity sound design team in their home studios, and contains tonal and percussive loops from a variety of sources.

## INSTALLATION

1. Download the Heavyocity Portal: <https://heavyocity.com/heavyocity-portal/>
2. Log in with your account and locate the #StayHome product under the 'Not Installed' tab, then click the 'Install' button to the right
3. Once the installation is complete, if you are a Kontakt full owner, you can load the Kontakt instruments through the 'Files' tab in Kontakt. Otherwise, you can drag the WAV or REX files into your sampler or DAW of choice.

## CONTENT

The #StayHome loops pack contains 81 loops. The loops are presented as Kontakt instruments (Kontakt full version only) as well as raw WAV files. The percussive loops are also provided as REX files. Each audio file is seamlessly looped and can be quickly loaded into your sampler or DAW of choice. Each file name details the name of the loop and the tempo where it sounds the best, as well as the root key it was created in and whether it is tonal or percussive.

### **Specs:**

297 MB

81 loops

- 42 percussive (WAV and REX)
- 39 tonal (WAV)
